EDUCATION

THE GEORGE WASHINGTON UNIVERSITY, School of Business

Master of Science in Information Systems and Technology – Artificial Intelligence

Washington, DC

May 2024

University of Maryland-Baltimore County

Bachelor of Science in Mechanical Engineering

Baltimore, MD

December 2020

EXPERIENCE

R.C.C.G. CHRIST CHAPEL MD

TEMPLE HILLS, MD

Software Engineer – Internal Tools and Platform

August 2023 - Present

- Engineered a multi-tenant file management system with RESTful APIs, database indexing, and integrated PostHog observability to optimize throughput, monitor performance, and improve reliability for 20+ weekly users
- Architected backend services and internal tooling for performance-critical workflows, leveraging Go and PostgreSQL to ensure efficient data processing and 30% faster business operations
- Deployed and maintained applications on AWS (EC2, RDS) and Vercel, implementing Docker and CI/CD pipelines to streamline releases and reduce manual configuration
- Implemented authentication, authorization, and role-based access management for 20+ users across multiple departments, ensuring secure and role-specific access.

Full Stack Developer

June 2020 – August 2023

- Developed and maintained user friendly and responsive web applications that improved search engine optimization and increased click-through rate by 20%
- Converted detailed mockups into usable web presences using tools like React, Typescript and Next.js
- Refactored legacy server-side business logic, increasing server response times by 15% and improving usability and streamlined operations
- Lead the transition from client-side rendering to server-side rendering, improving web page load speeds by 30%

SKILLS

Programming Languages: Python, Go, SQL, TypeScript

Databases & Data Engineering: PostgreSQL, MongoDB, Multi-Tenant Schemas, Query Optimization, Indexing

Infrastructure & Deployment: AWS (EC2, RDS), Docker, CI/CD Pipelines

Methodologies: REST APIs, Full Stack Development, Database Design, Role Based Access Management

RELEVANT PROJECTS

SlackShots – Open-Source Workspace File Management

July 2023 - Current

- Automated, open-source, multi-tenant file management system built in Next.js with TypeScript, MongoDB indexing, and observability integration for improved performance and reliability

ChronoCast – Stream Management System

April 2024 - Current

- Constructed performance-critical systems written in Go with PostgreSQL intent-based stream management and multi-channel RTMP video processing

V-Eazy Worship – Automated Scripture Extraction System

May 2024 - Current

- Reverse-engineered SQLite databases and developed internal tooling in Go for automated data extraction, cleaning, and structured output

ACHIEVEMENTS

MORGANHACKS 2024 (1ST PLACE)

BALTIMORE, MD

April 2024

- Developed Signify, AI-powered smart glasses for real-time sign language translation, earning recognition for innovation and execution at MorganHacks 2024 Hackathon
